

BLOCKCHAIN Y ENERGÍA

CASOS DE ÉXITO

Alex Puig

CEO de Alastria

CTO de Caelum Labs

Utilities

tipo de proyectos en Blockchain

10%

Metering

Data exchange between stakeholders of Smart Grid applications, intelligent control systems, as well as the standardization of data transfers

20%

Grid management

Value exchanged between devices in the form of data, network access, currencies, compute cycles, contracts for ongoing service, trusted introductions to other devices

40%

Decentralized Generation

Real-time metering of local energy generation and P2P transaction management

20%

EV Charging

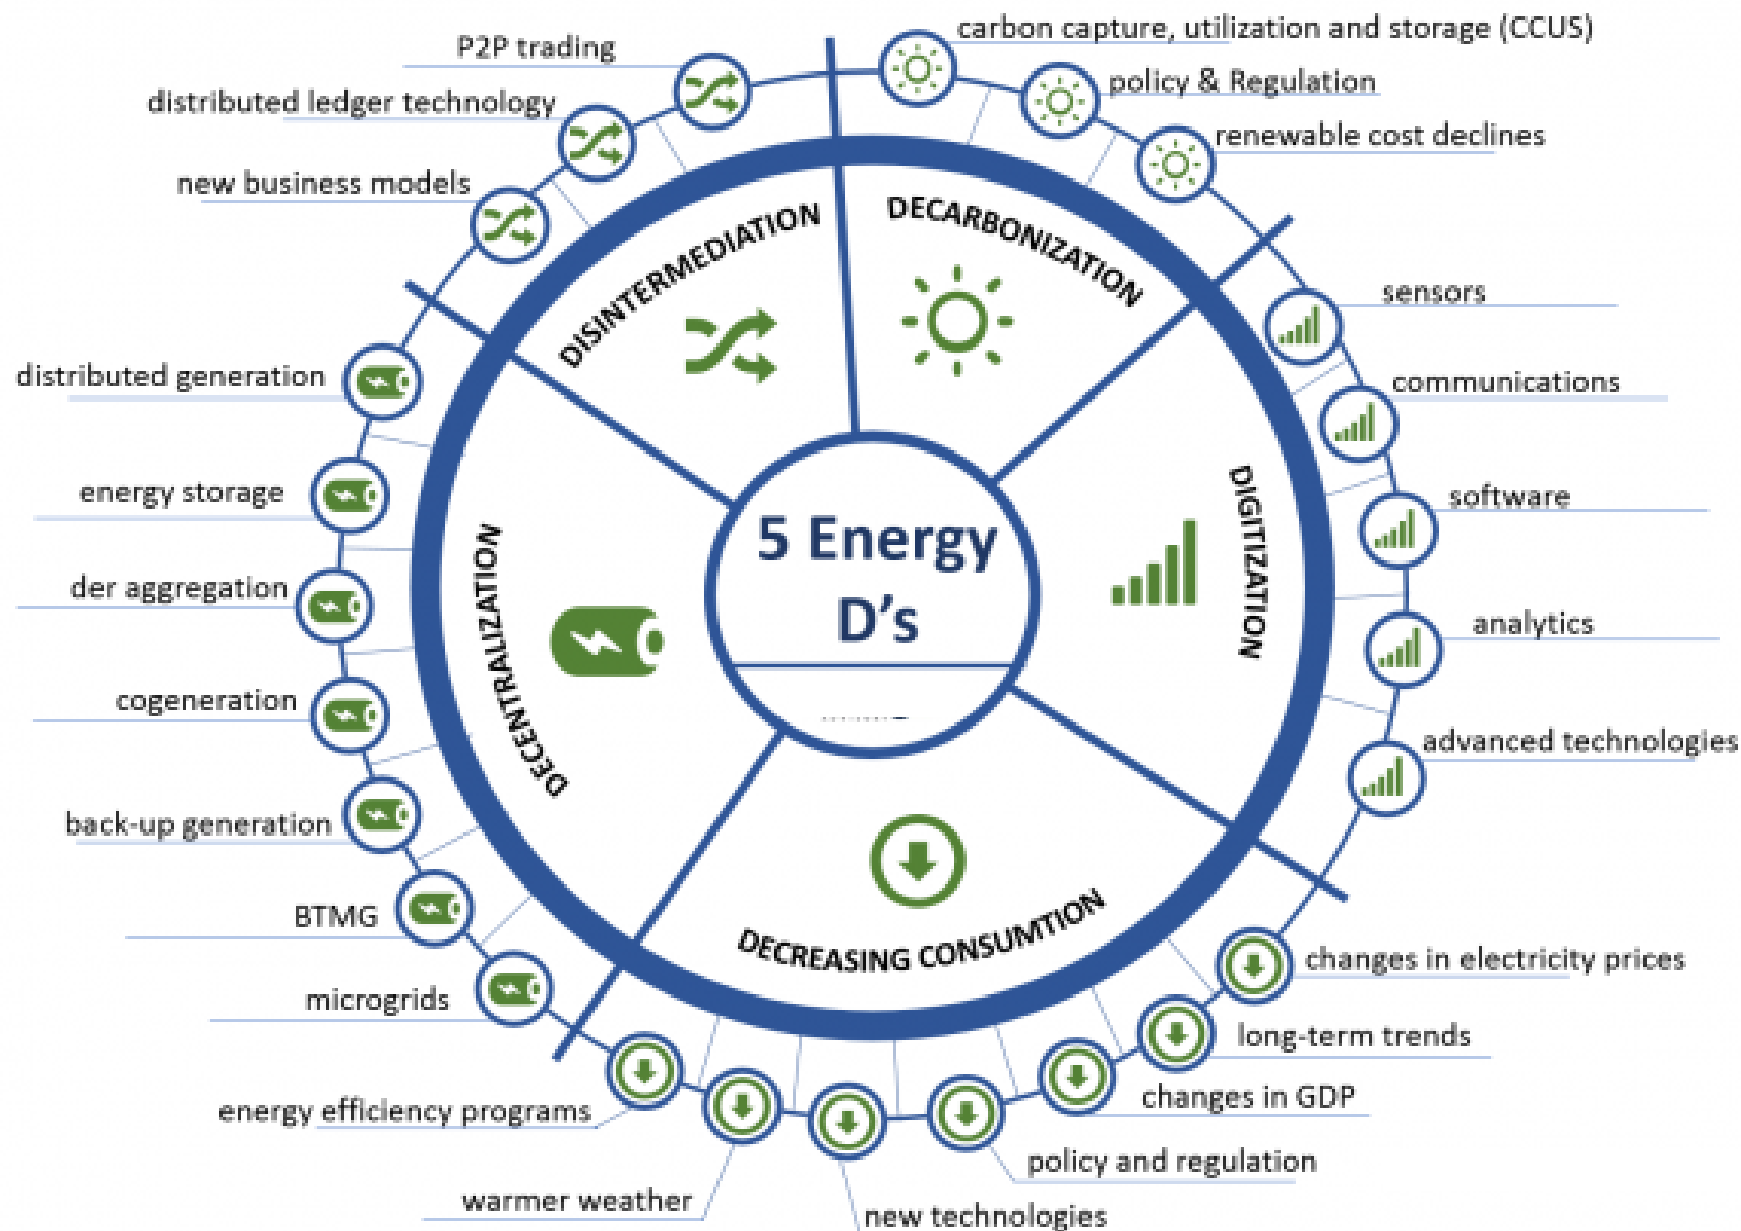

Develop EV Charging Stations that use blockchain based smart contracts to authenticate users and managing the billing process

10%

IOT

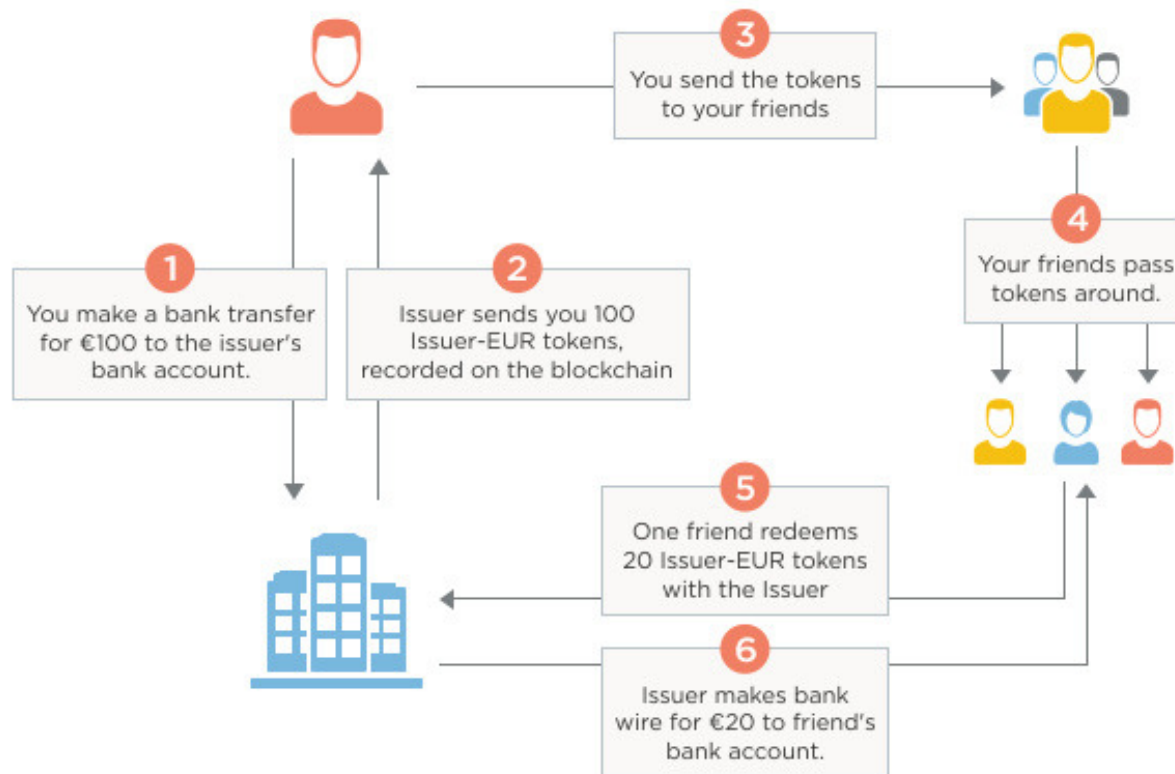

Continuous identification of new applications of blockchain for IOT and the Connected Home markets

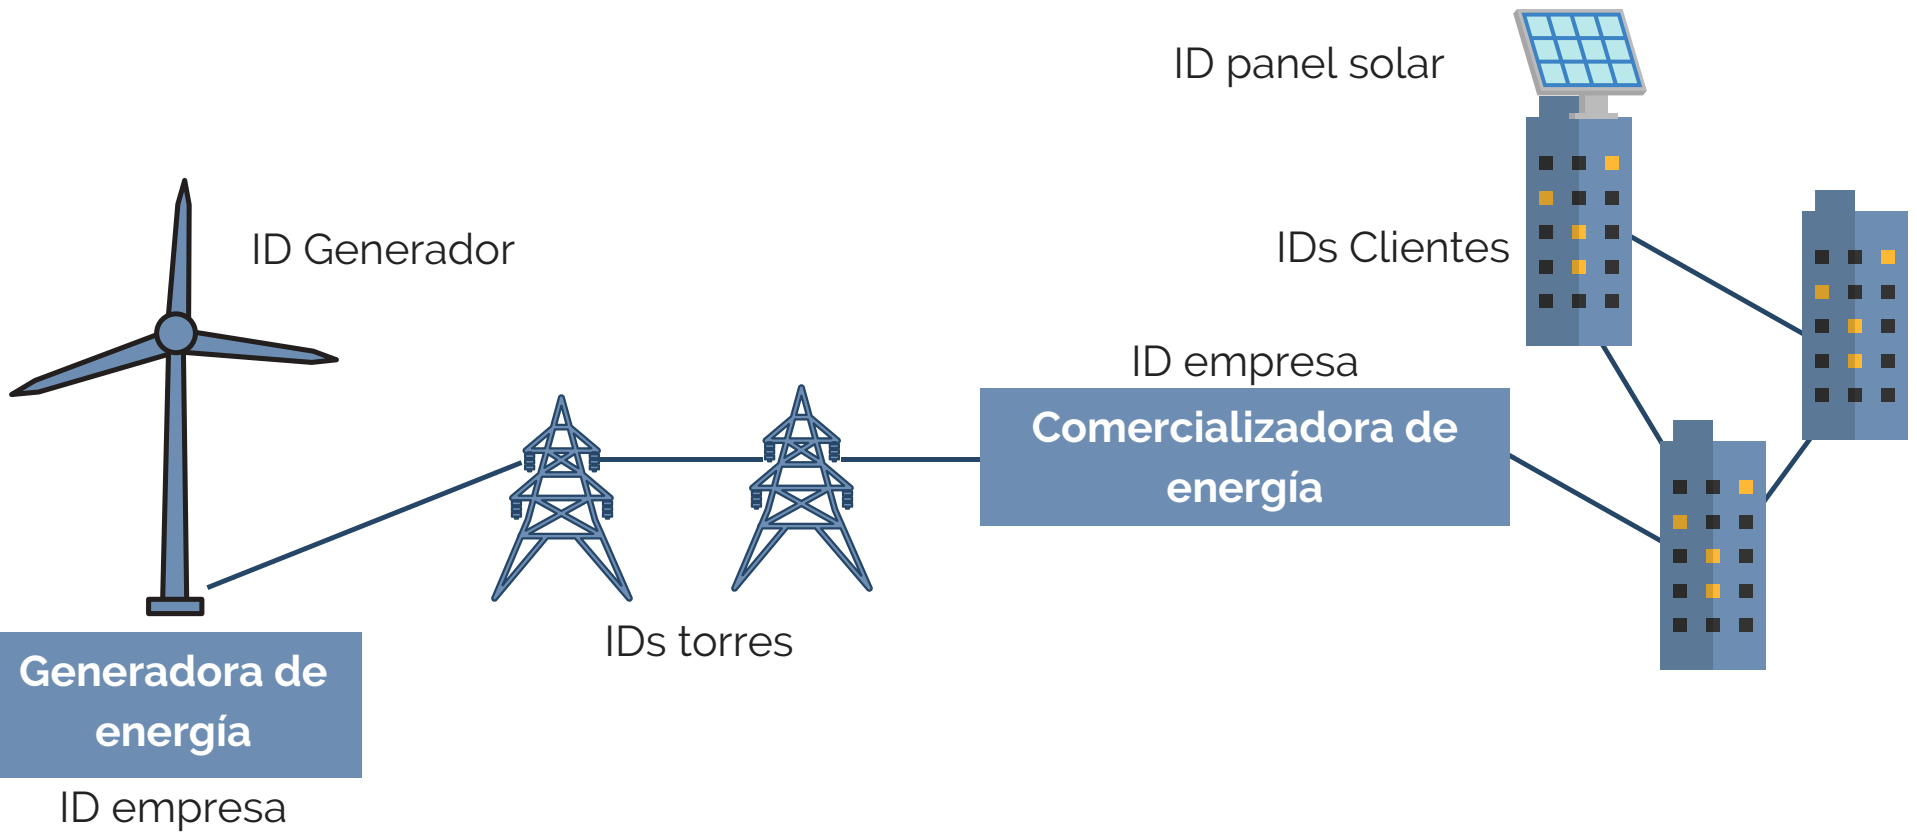

¿Tokenización?

Representando *todos* nuestros
assets en blockchain

¿Cómo funcionan?

Oportunidades en la *trazabilidad*

Lleva la energía contigo

Que tu contrato te acompañe a
todas partes

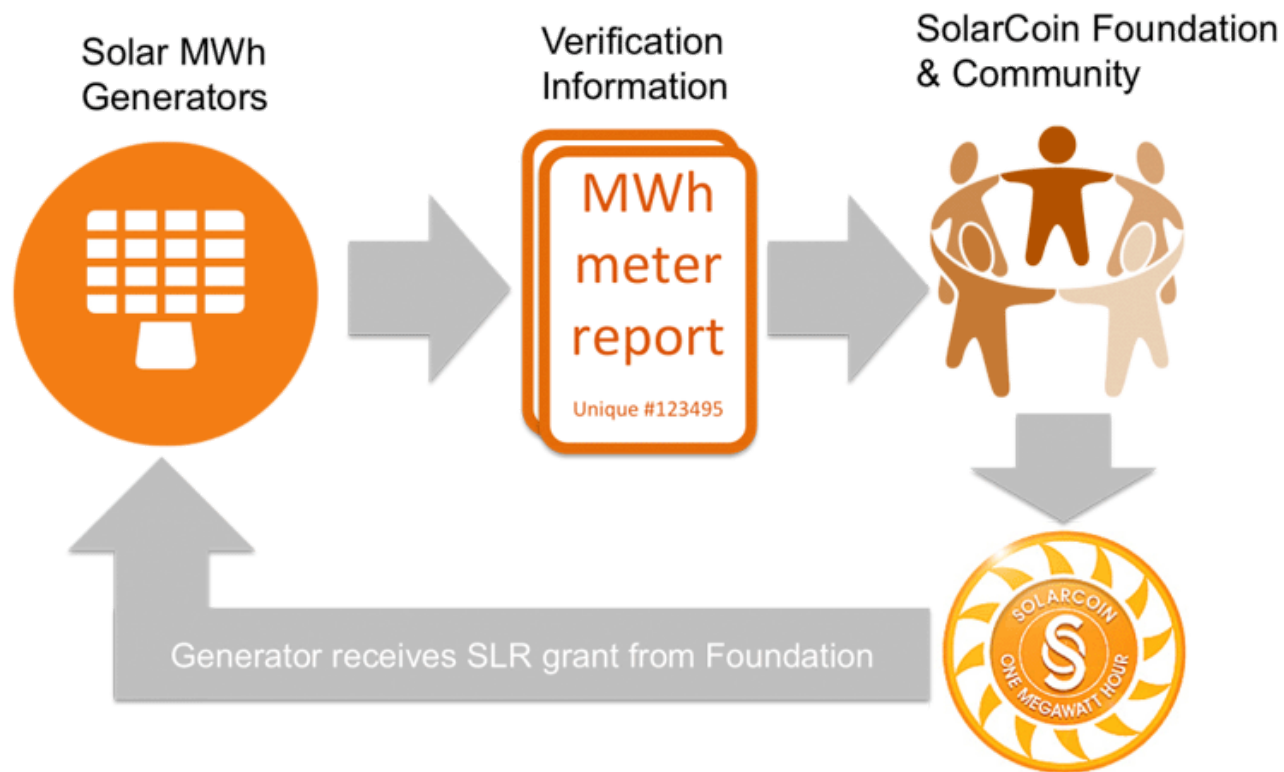

COINTELEGRAPH

Solarcoin

Energy generation enables circulating SolarCoins

Drift

How does Drift work? It's simple.

Get access to cleaner
and local energy

Artificial intelligence
keeps your costs down

Track your
environmental impact
over time
